

**Russian Innovation Week**  
**EXPERTS SESSION «THE BUREAU OF THE FUTURE»**

October 2, 2009, 10.00-11.30, Lenexpo, pavilion 7, hall 7-2

**PROGRAM**  
**of the section «Green City: New Energy, Energy Efficiency»**

Experts session "The Bureau of the Future" is intended to provide an open forum for discussion of long-term trends, challenges and future scenarios for a large megapolis (by the example of St. Petersburg), to determine prospects for creation of new markets for technologies.

**"The Bureau of the Future" objectives:**

- Discussion of topical issues concerning future development of St. Petersburg (and other large Russian cities).
- Attraction of leading Russian and foreign experts to participation in the management of St. Petersburg development process
- Drawing up recommendations to government authorities on making strategic decisions and initiation of long-term projects.

**Questions to be discussed within the section framework:**

- What trends are decisive for energetic systems development in Russian cities?
- What technologic solutions would be demanded in the sphere of energy supply?
- What tools are available for government authorities to open new technologic markets in power generation sphere (administrative, market, financial etc.)?

**Moderator: Vladimir Knyagin, Director, Center for Strategic Research "North-West"**

**The session procedure:**

- 10.00 Introduction to discussion, presentation of problems
- 10.15 Experts' reports on the theme of the session, discussion of reports
- 11.10 Questions and opinions
- 11.20 Summing up the session
